ELVARO TECHNOLOGIES

Mumbai, India

Software. AI. Automation.

Company Profile

Elvaro Technologies is a software and technology company based in Mumbai, India. A software company built for real businesses. We design and build practical software — focused products, select client partnerships, and tools that fit how teams actually work.

What We Do

- Custom software and digital products shaped around real workflows
- Websites and web applications teams can operate after launch
- AI-assisted features, chatbots and agents with clear guardrails
- Business process automation between the tools you already use
- Focused products: Elvaro Business Intelligence, AI Widget and Labour Management Software

Core Services

- Custom Software Development
- Website & Web Application Development
- AI Solutions & Integration
- AI Chatbots & AI Agents
- Business Process Automation
- SaaS Product Development
- UI/UX Design
- API Development & Integration
- Data Management & Dashboards
- Maintenance & Technical Support

Industries We Serve

We develop technology solutions for organisations across science and healthcare, business and finance, commerce and consumer, industrial and infrastructure, and technology and public-sector contexts — as a technology partner, not as a specialist claiming regulated expertise we do not hold.

Science & Healthcare | Business & Finance | Commerce & Consumer | Industrial & Infrastructure | Technology & Public Sector

Products · Services · Solutions · Industries — explore the full site for detail.

Technology Capabilities

- Modern web applications (TypeScript-first delivery)
- Product UI/UX for daily operators
- API integrations and data workflows
- Dashboards and internal tools
- AI features grounded in approved knowledge
- Automation with explicit owners and failure paths

How We Work

01 Discovery & planning
clarify users, scope, budget range and approach

02 Design & development
build against the agreed first release

03 Testing & handoff
verify critical paths and hand over as agreed

04 Support & maintenance
available when arranged separately
